THE LIONBRIDGE TRANSLATION ENABLEMENT PLATFORM

Remove Inefficiency, Complexity, and Manual Repetitive Tasks From the Localization Process

The localization process is overwhelming. Manually transferring and managing files can be repetitive, arduous, and error-prone. This process is both outdated and costly—your staff spends significant time chasing files, making calls, and shifting focus from their main responsibilities. We designed the Lionbridge Translation Enablement Platform to remove inefficiency, complexity, and manual repetitive tasks from the localization process. The platform automates translation tasks and simplifies the localization process.

The Translation Enablement Platform provides a secure single solution that enables end-to-end online management of any translation project and full access to Lionbridge's complete suite of services. From a single sign-on, users can scope, launch, and track work in progress through custom dashboards and a translation library.

LIONBRIDGE

Platforms and Technologies to Support a Seamless Experience

Don't spend $500k on a platform that you need to configure, manage, and maintain. Instead, sign up with Lionbridge's Translation Enablement Platform and let Lionbridge manage all your updates, maintenance, and support costs for FREE (excluding integration).

Leverage your current IT investment as we integrate into your Content Management Systems.

With customizable workflows and preferences, our intuitive interface allows users to monitor projects in real-time, view translations in-context, and track KPIs.

Part of Lionbridge's best-in-class global network, with tens of thousands of translators supporting hundreds of local markets and languages.

Lionbridge's Translation Enablement Platform Has Five Key Capabilities

|	
Portal	Provides a dashboard view of all recent active items Mainly used for account management and technical support
Orders	Submit translation orders directly to Lionbridge Manage quotes and download report data
Reviews	Ideal for your dedicated reviewer or in-country specialist to review translations prior to sign off
Collaboration	Allows users to share information, ask and answer questions, and track defects
Translation Workspace	Always up-to-date and available translation memory and glossary

Security
Lionbridge's Translation Enablement Platform provides role-based access enablement and disablement. The ability to federate identities for authentication allows your IT department to have full control over login credentials.

All communications and file transfers are 256bit encrypted via HTTPS.

Integration Capabilities
The Translation Enablement Platform provides robust capabilities for integration into a variety of Content Management Systems (CMS) to ingest content from multiple data sources.

We can reduce translation turnaround times by up to 60% to ensure content gets to market faster, at a lower cost.
