AMAZON TRANSLATE & LIONBRIDGE:
Best-of-Breed NMT & PE Solution

As global businesses continue to innovate to provide immediate, relevant content that meets changing customer demands, neural MT offers a solution that performs more quickly and accurately than ever before.

Lionbridge is pioneering new translation technology that delivers high-quality, relevant, and cost-effective content through our partnership with Amazon Translate.

LIONBRIDGE

NMT&PE

Amazon Translate delivers fast, high-quality, and affordable language translation through a form of automation that leverages deep learning and neural networks. The resulting translations are more accurate and natural-sounding when compared to translations delivered via traditional statistical and rule-based translation algorithms.

With Amazon Translate, Lionbridge helps our customers forge meaning with *their* customers more efficiently and cost-effectively. We offer a full range of post-editing services that enhance NMT output and meet a variety of needs.

- **Basic Post-Editing:** The post-editor performs minimal modifications to the NMT translations to make them understandable.

- **Premium Post-Editing:** The post-editor performs all necessary modifications to the NMT translation to produce an accurate translation, which should read as if it had been written in the target language.

- **Focused Post-Editing:** Selective, budget-sensitive customization maximizes the quality of unsupervised NMT by limiting post-editing to customer-designated criteria (section titles, specific terminology, etc.).

When to Use?

Machine Translation Post-Edit (MTPE) Services can extend your organization's localization capacity and expand the range of content you can translate. Our expert guidance, NMTPE workflow, and global translator network make this a flexible alternative to meeting select translation needs.

Choose NMTPE service for:

Large-Volume Text Translations	Time-Sensitive Content	Informative Content
User-Generated Content	Emails or Streaming Updates	Technical and Customer Support Documents

Amazon Translate & Lionbridge Will Help:

- Improve the efficiency of traditional translation projects

- Increase translation productivity by integrating NMT and NMTPE into existing localization processes

- Accommodate high content volumes and accelerate time to market

- Optimize localization budgets and increase the amount of content that can be translated

- Leverage the best-of-breed NMT, work processes, and specialized human post-editing for significantly improved translation ROI

Lionbridge Expertise:

- World's leading language services provider

- 15+ years of experience in MT&PE

- Post-editing in 115 language directions

- Largest network of post-editors in the industry

- Custom solution for each customer based on needs
